Old Pal

# ELECTRIC SPINNING REEL\*

## New concept in spin fishing

The revolutionary Old Pal REEL-LECTRIC is a precision-made, electric spinning reel designed for the discriminating sportsman. It is the culmination of years of work by top fishermen and modern electronic engineers. REEL-LECTRIC provides smoothness, power and a range of speeds exceeding equivalent hand-cranked spinning reels.

The rechargeable Power-Pac contains two nickel-cadmium energy cells which supply power for a full day's fishing by the average angler. A thumb-control button instantly gives a range of three lure retrieves from slow to high-speed. The positive anti-reverse can be activated without changing hands. An angler can actually spin fish with the REEL-LECTRIC by using only one hand, and it doesn't matter if he is right or left-handed!

The REEL-LECTRIC is balanced for use on any standard spinning rod.

## Quality engineered for years of service

- Power-Pac can be easily attached or replaced in seconds
- Sculptured design in guaranteed unbreakable space age material—General Electric Lexan®
- Three-speed variable retrieve—top speed exceeds 1:5 ratio hand reels; more powerful than 1:3 ratio hand reels
- Lifetime tungsten carbide line roller
- Stainless steel full bail
- Self-lubricating bearings
- Ball bearing on mainshaft for smooth lifetime operation
- Du Pont Delrin® gears
- Permanent magnet high-torque motor
- Helical gear drive for quiet operation and high strength
- Salt water proof finish
- Weighs only 26½ ounces
